TORONTO AND MELBOURNE

PREFACE TO THE 1909 EDITION

This Atlas has been prepared to accompany the new edition of *The Imperial Gazetteer of India*. The original scheme was planned by Mr W. S. Meyer, C.I.E., when editor for India, in co-operation with Mr J. S. Cotton, the editor in England. Mr Meyer also drew up the lists of selected places to be inserted in the Provincial maps, which were afterwards verified by Mr R. Burn, his successor as editor for India. Great part of the materials (especially for the descriptive maps and the town plans) were supplied by the survey of India and by the departments in India concerned. The geological map and that showing economical minerals were specially compiled by Sir Thomas Holland, K.C.I.E. The meteorological maps are based upon those compiled by the late Sir John Eliot, K.C.I.E., for his *Climatological Atlas of India*. The ethnological map is based upon that compiled by Sir Herbert Risley, K.C.I.E., for the *Report of the Census of India*, 1901. The two linguistic maps were specially compiled by Dr G. A. Grierson, C.I.E., to exhibit the latest results of the Linguistic Survey of India. The four historical sketch-maps — showing the relative extent of British, Muhammadan, and Hindu power in 1765 (the year of the Diwani grant), in 1805 (after Lord Wellesley), in 1837 (the accession of Queen Victoria), and in 1857 (the Mutiny) — have been compiled by the editor in England. The archaeological sketch-map is due to Dr James Burgess, C.I.E.

The whole has been carried into execution, under the supervision of the editor in England, by Mr J. G. Bartholomew, who devoted much personal attention to the work, and whose expert knowledge has been of great value. Mr Bartholomew is also responsible for the index, which, it should be stated, applies only to the Provincial maps and Afghanistan.

PREFACE TO THE 1931 EDITION

In the preparation of a new edition of the Atlas, which constitutes the final volume of *The Imperial Gazetteer of India*, opportunity has been taken to revise the maps included in the earlier edition in accordance with the most recent collated information and material. Thus, Agricultural Products, previously treated in two plates, are now exhibited in three plates, showing twelve crops instead of eight; for the map of Military Divisions has been substituted the Command Map of India which indicates existing Commands, Districts and Independent Brigades; the introduction of an extra plate has enabled the present organisation of Bengal, Bihar and Orissa, and Assam in three separate provinces to be portrayed; the Archaeological Sketch-Map has been revised to depict all the most important places of archaeological interest in the several provinces of India including Burma and Baluchistan; and the results of recent surveys carried out by the Surveyor-General of India have been embodied in the map of Nepal and part of Tibet. Further, for the greater convenience of the reader the number of each plate has been printed on the front of each folio.

Special acknowledgments are due to Sir George A. Grierson, O.M., K.C.I.E., Ph.D., D.Litt., LL.D., F.B.A., I.C.S. (retd.), who with his unique knowledge has most kindly supervised the revision of the linguistic maps, and to Messrs John Bartholomew & Son who have again undertaken the production of the volume and the compilation of the index.
